EDUCATION

Western University **London, Ontario**
Electrical and Artificial Intelligence Systems Engineering Sept. 2023 – May 2028

- 3.8/4.0 GPA (90.1%). Recipient of Dean's Honour List Award
- Winner of Western Engineering Innovative Competition, Junior Lead for Western Development Society

WORK EXPERIENCE

NPHP Tutoring **Toronto, Ontario**
High School Tutor Sep 2024 – Present

- Tutored high school students in IB Math, Chemistry, and Physics, tailoring content to individual needs.
- Assessed academic progress and set goals through regular communication with students, parents, and teachers.
- Tracked student performance using MS Office, ensuring accurate records and personalized learning plans.

Zora Corp **Kitchener, Ontario**
Software Engineering Intern May 2024 – Aug. 2024

- Built tenant scoring algorithms using data analytics, improving efficiency and accuracy of rental application assessments.
- Created automation tools to streamline property management processes, reducing manual tasks and enhancing workflow.
- Analyzed rental market trends and incorporated new data sources to improve predictive insights and decision-making.

LEADERSHIP and TECHNICAL EXPERIENCE

GLOW AI - Data-Driven Personal Assistant System **Mar. 2025 – Present** •

Developed data/NLP pipelines to process and analyze trends in scheduling, weather patterns, and user preferences.

- Applied NLP techniques to extract and categorize user queries for improved decision-making.
- Designed UML models to map data flow, system interactions, and architecture.
- Collaborated with a multidisciplinary team to refine data processing and optimize system performance.
- Analyzed API data to generate insights and enhance automation efficiency.

WeMars – Western University Mars Rover Team **Sept. 2024 – Present**

- Helped design and test the rover's electrical and power systems, including PCB layouts and wiring for reliability in competition conditions
- Worked with software and mechanical teams to integrate sensors, motor controllers, and key electrical components for smooth rover operation.
- Led a small group of engineers in troubleshooting, circuit validation, and preparing the rover for field testing.

UMOJA Robotics **Jan. 2023 – Present**

- Taught circuit design, sensor integration, and motor control using C++ and microcontrollers for robotics.
- Guided students in control systems, signal processing, and power management to optimize competition performance.
- Worked with mentors to expand African Canadian STEM participation and optimize robot components.

SKILLS AND INTERESTS

Soft Skills: Collaboration, Leadership, Initiative, Communication
Electrical & Embedded Skills: Circuit Design, Verilog, FPGA, AutoCAD Electrical, PLC Programming, Control Systems, RTOS
AI & Data Science: ML & NLP (TensorFlow, Sklearn, PyTorch, NumPy, Matplotlib, Pandas), Data Pipelines, SQL
Tools: IntelliJ, Django, C (Programming language),C++, Java, MATLAB, Onshape, Microcap, Git, Altium, JIRA, MySQL, Simulink
Achievements & Interests: Ontario Scholars Award, FRC Design Challenge Winner, WEC Innovation Design Challenge Winner | Music, Cooking, Soccer, Volunteering, Hiking
